PROJECTS

SmartSpend - AI-Powered Personal Finance Platform | [Live](#) | [GitHub](#)

2026 - Present

- Built and deployed a production-ready full-stack AI-powered personal finance platform using Next.js, Express.js, PostgreSQL, Prisma ORM, and Google Gemini AI.
- Implemented secure authentication using JWT, HTTP-only cookies, protected routes, and production-ready CORS configuration for cross-origin authentication.
- Designed scalable REST APIs following a layered architecture (Routes, Controllers, Services) for authentication, transaction management, dashboard analytics, and AI-powered financial insights.
- Integrated Google Gemini AI to analyze transaction history and generate personalized spending analysis, budgeting recommendations, saving suggestions, and financial insights.
- Developed responsive dashboards featuring interactive charts, category-wise expense analysis, monthly financial summaries, search, filtering, pagination, and transaction management.

Skill Share - Full Stack Professional Networking Platform | [Live](#) | [GitHub](#)

2025-2026

- Built a full-stack professional networking platform inspired by LinkedIn using Next.js, React, Node.js, Express.js, and MongoDB.
- Implemented secure JWT authentication, protected routes, user profiles, post creation, likes, comments, and connection request functionality.
- Designed RESTful APIs following the MVC architecture and optimized MongoDB data models to efficiently manage users, posts, and social interactions.
- Integrated Cloudinary for image uploads and deployed the application with a responsive user interface optimized for desktop and mobile devices.

TalkSphere - Real-Time Video Conferencing Platform | [Live](#) | [GitHub](#)

2025-2026

- Developed a real-time video conferencing platform using React, Node.js, Socket.IO, WebRTC, and MongoDB with secure JWT-based authentication.
- Implemented peer-to-peer audio and video communication using WebRTC while managing signaling, room creation, and participant synchronization with Socket.IO.
- Built group video calls, real-time messaging, screen sharing, and meeting room management to enable seamless collaboration between multiple users.
- Designed scalable backend APIs and securely stored chat history, meeting metadata, and user information in MongoDB.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Databases: PostgreSQL, MongoDB, Prisma ORM

AI & APIs: Google Gemini AI, REST APIs

DevOps & Cloud: Docker, Git, GitHub, Vercel, Render, Neon

Authentication: JWT, HTTP-only Cookies

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, MVC Architecture, RESTful APIs, Zod Validation, WebRTC, Socket.IO

COURSEWORK

Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming
